Profile

Full-stack developer building production ERP, web and mobile systems: custom Odoo modules in Python, React Native apps in TypeScript. I work across stacks by design, and a new framework is a ramp rather than a wall.

Skills

Programming

Python TypeScript JavaScript Dart
Java SQL Rust

Frameworks

Odoo React Native Expo Flutter
React SvelteKit Node.js Express
FastAPI Flask Spring Boot Tauri

Data & Infra

PostgreSQL Redis SQLite Docker Git
REST WebSockets JWT CUDA

Methodologies

SCRUM Kanban

Languages

English & Portuguese

Experience

Eclypsys

Full Stack Developer 2024 - present

Designed, developed, and maintained enterprise-level ERP and e-commerce applications, working across backend, frontend, and integration layers. Utilized Odoo, Python, and React Native to build scalable, maintainable systems supporting core business operations, from custom ERP modules to a customer-facing mobile app.

Fed. Portuguesa de Artes Marciais Chinasas

Administrative Technician 2017 - 2024

Primary communication liaison between the federation, its member associations, athletes and trainers. Handled database management and member support, planned and ran championships and workshops, and maintained the federation's website alongside its social channels.

Education

Code for All_

2024

A 14-Week Intensive & Immersive Full Stack Programming Bootcamp

Faculty of Arts and Humanities (FLUP)

2015

(Frequency) Bachelor in Applied Languages

Faculty of Sciences (FCUP)

2011

(Frequency) Integrated Master's Degree in Network and Information Systems Engineering
